

BORDLEY TOWNSHIP PROJECT

WHAT WE DID TODAY

11TH SEPTEMBER 2013

Field Surveying

Lainger Field Q

This week four more project members were out surveying: Janis, Bob, Julia and Phil. We were lucky to complete the feature close to the lower gate before the rain came. The broad bank supports several large boulders to form a sub-circular enclosure. A linear earthwork runs from the feature in a 'T' shape. Some earthworks can be seen in the field beyond which appear to be a continuation of the feature in Field Q.

Discussing the position of the flags

Large boulders forming enclosure wall

Linear feature running in front of the tripod

'T' shape seen clearly (upper centre of photograph – left to right from boulder)
